Bosch Trucking Attention: Steve Foreaker 5600 S. Washington Bartonville, IL 61244

Dear Mr. Foreaker:

On August 11, 1988, your facility was inspected by Tim Case representing the Illinois Environmental Protection Agency. The purpose of this inspection was to determine your facility's compliance with 35 III. Adm. Code Parts 720-725. A copy of the inspection report is enclosed. Based on information obtained at the time of the inspection, it appears your facility is presently not regulated under 35 III. Adm. Code Parts 720-725.

Therefore, since it appears your facility is presently not regulated under 35 III. Adm. Code Parts 720-725, we recommend that you complete and submit the enclosed Facility Notification (8700-12) Amendment or Withdrawal Request Form. The enclosed form should be sent to the address shown on the form.

Please be reminded that if, in the future, your facility should handle hazardous waste regulated under 35 III. Adm. Code Parts 720-725 you would be required to comply with the standards of 35 III. Adm. Code Parts 720-725. You would also be required to amend your EPA Notification Form 8700-12 to reflect your change in status.

If you have any questions feel free to contact Tim Case at 309/693-5462.

Sincerely,

EPA Region 5 Records Ctr.

## NARRATIVE

A RCRA inspection was conducted at the Bosch Trucking Company on August 11, 1988, by this author (Tim Case). This inspection was conducted in response to an anonymous complaint received by the Peoria Region DLPC on July 22, 1988. The complainant said that the facility is storing hazardous waste behind the building in an uncontrolled area. The complainant also said that the drums of waste being stored were leaking. See Complaint #C-88-113-P. The facility notified as a generator on December 22, 1986. The facility's IEPA number is 143 005 5008 and the USEPA number is ILD 005938790.

This author arrived at the facility at 2:30 p.m. Steve Foreaker, shop foreman, represented Bosch Trucking. The entire facility was inspected. The facility has one waste stream. This is the used crankcase oil that is removed from the semitractors. It is stored in 55-gallon drums adjacent to the building. None of the drums were leaking and all were in good condition. Mr. Foreaker said that Lenz Oil periodically removes the waste oil. Mr. Foreaker said that no other waste stream is generated by the facility. He said that new products and fuel additives are stored in the warehouse and all of the product is used in the trucking operation.

The author departed at 3:00 p.m.
